

Organized, detail-oriented graduate with strong grasp of Data Structures and Algorithms, and a knack of learning anything, looking for an opportunity that would challenge my skillset and help me to deliver top quality insights and solutions.

## Professional Experience

### Full Stack Engineer (Jr.) at Mentor Match

October 2022 – December 2022

- **Technologies Used** – NodeJS, NestJS, NextJS, Flutter, Python, PostgreSQL, Git, Jenkins
- **Responsibilities** –
  - Create and implement design plans shared by the Tech lead
  - Develop RESTful web services to interact with the Mentor Match portal
  - Provide up to date Reports from backend to stakeholders
  - Review code work by peers for accuracy and functionality
  - Maintain proper documentation for missing or new functionality

### Software Engineer at Web Access

May 2023 – Present

- **Technologies Used** – Php, Drupal 7/9, MySql, Html, Css, Javascript, Git
- **Responsibilities** –
  - Create and implement design plans shared by the Tech lead
  - Developed custom Drupal modules and themes to add dynamic features per client specifications
  - Contributed to migration to Drupal 9 organizing content model planning sessions
  - Documented code by adding comments & help documentation to assist ongoing maintenance

## Educational Qualifications

|                       |      |                                                 |                                   |
|-----------------------|------|-------------------------------------------------|-----------------------------------|
| <b>Graduation</b>     | 2021 | B.Sc. in Computer Science<br>– 63 %             | Mumbai University                 |
| <b>Junior College</b> | 2017 | Higher Secondary School Certificate (HSC) – 45% | Maharashtra State Board – MSBSHSE |
| <b>School</b>         | 2015 | Secondary School Certificate (SSC) – 65 %       | Maharashtra State Board – MSBSHSE |

## Projects

- **Disease prediction using Machine Learning** - [Github](#)
  - System which provides the user the means to find out his/her disease using prediction algorithms.
  - The user he/she would input her symptoms and the system would run her symptoms through algorithms which in turn would produce output of his/her disease.
  - Input would be symptoms
  - Output would be 70% likelihood of it being the users disease
  - Technologies used Python (Pandas, Sklearn, Numpy)
  - ML Algorithm used Decision tree, RandomForest, Naive Bayes
  - Data Source was Kaggle Database
- **Typing Speed GUI in Python** - [Github](#)
  - A GUI application which tells the users typing speed.
  - The GUI application displays a string of text which the user has to copy into the input text-box below. The app then calculates the time taken by the user to type the sentence.
  - The users input string
  - the calculated speed of the words in Characters per Minute(CPM) and Character per Second(CPS)
  - Technologies used Python
  - Data Source was <https://gist.github.com/erickedji/68802>

## Technical Skills

- Python versions 3.4 onwards, Java 8+
- SQL – MySQL (8.02.5), PostgreSQL ()
- Microsoft Office 16, proficient in Word, Excel, Powerpoint
- Unix – Ubuntu (16.04.1 LTS)
- Windows 7, 10

---

## Co-Curricular Activities

- [Coursera](#) – Python for Everbody (University of Michigan)
- [Udemy](#) – Automate the Boring Stuff with Python
- [HackerRank](#) – Completed Python Course with 5 stars – Profile Link
- [Github Profile](#) – Personal Projects Profile Link
- Volunteered in College Fest (SOUL) - Part of Security team that managed crowd flow
- Deforestation Awareness Campaign on Environment Day – Led a group of 25 to spread awareness

---
